# ABOUT US

## TEJAS INTERNATIONAL VENTURES

**TEJAS INTERNATIONAL VENTURES** is a leading global trading company specializing in the manufacturing, supply, export, and import of a wide array of high-quality products. With years of experience in international trade, the company has built a strong presence in various sectors, particularly in agriculture, industrial goods, and raw materials. Tejas International Ventures prides itself on being a reliable partner to businesses across the globe, offering consistent product quality, timely deliveries, and competitive pricing. The company's diverse offerings cater to a broad range of industries, from agriculture and food processing to construction and manufacturing.

The company's extensive product portfolio includes agricultural commodities like grains (Wheat, Maize, Rice), spices (Turmeric, Black Pepper), fresh fruits (Mango, Banana, Guava), and vegetables (Onions, Potatoes). Additionally, Tejas International Ventures supplies raw materials such as coal and stone chips, which are essential for the construction and manufacturing sectors. The company also handles organic products like cow dung and sugarcane, which are in high demand in agricultural practices and bioenergy. As a trusted supplier, exporter, and importer, Tejas International Ventures has established itself as a go-to source for high-quality agricultural and industrial products.

Tejas International Ventures operates with a customer-first approach, ensuring that all transactions are seamless and efficient. Whether acting as a manufacturer, supplier, exporter, or importer, the company ensures that its products meet international standards, helping businesses across the world maintain a steady and high-quality supply of goods. With strong partnerships with suppliers, farmers, and global distributors, Tejas International Ventures guarantees premium quality and reliable delivery. The company's commitment to excellence and customer satisfaction has made it a preferred choice in international trade.

# • Fruits Category

**Fruit suppliers and exporters** play a vital role in the global food supply chain by providing fresh, high-quality fruits to domestic and international markets. They work directly with farmers and orchards to source a variety of fruits such as apples, bananas, mangoes, grapes, and citrus fruits. These suppliers ensure the fruits are harvested at peak ripeness and then properly sorted, graded, and packaged to maintain their freshness and nutritional value during transportation.

Exporters are responsible for navigating international trade regulations, managing logistics, and ensuring that the fruits meet the quality and safety standards of the importing countries. They often invest in cold storage and advanced packaging technologies to extend shelf life and minimize spoilage. With the rise in global demand for exotic and seasonal fruits, exporters have expanded their operations to reach markets across Asia, Europe, the Middle East, and North America.

The fruit export industry not only boosts the agricultural economy of producing countries but also promotes healthy eating habits worldwide. By supplying fruits year-round regardless of season, these businesses help balance supply and demand across different regions. Additionally, the sector provides employment to thousands, from farm laborers to logistics professionals, making it a key contributor to rural development and global trade

**Mango**

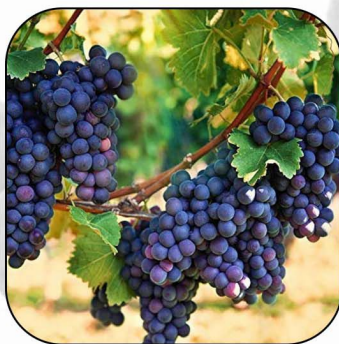

**Sugarcane**

**Apple**

**Orange**

**Grape**

**Watermelon**

**Pineapple**

# • Spices Category

**Spices suppliers and exporters** play a crucial role in connecting farmers and manufacturers with global markets. These businesses procure a wide range of spices such as turmeric, cumin, black pepper, cardamom, cloves, and chili from local growers or producers, ensuring they meet quality and safety standards. After proper cleaning, sorting, and packaging, these spices are made ready for both domestic distribution and international export. Suppliers often work directly with farmers or cooperatives to maintain freshness and ensure a consistent supply chain.

In the international market, Indian spice exporters are particularly renowned due to the country's rich agricultural heritage and diverse climate, which supports the cultivation of various spices. Exporters typically comply with global regulations such as ISO, HACCP, and organic certifications to ensure their products meet international quality benchmarks. These companies also manage logistics, documentation, and customs processes to facilitate smooth exports to regions like the Middle East, Europe, North America, and Southeast Asia.

Today, many spice exporters are embracing modern technology to enhance their operations. From traceability software to e-commerce platforms, these innovations help suppliers and exporters manage inventory, track shipments, and connect with clients worldwide. Additionally, sustainable sourcing and eco-friendly packaging have become important trends, helping suppliers appeal to environmentally conscious customers. As global demand for natural flavors and healthy cooking ingredients rises, the role of spice suppliers and exporters continues to expand significantly..

**Cinnamon**

**Bay Leaf**

**Turmeric**

**Ginger**

**Garlic**

**Black Pepper**

**Cumin Seed**

**Mustard Seed**

**Cardamom**

**Clove**

**Vegetable suppliers and exporters** play a vital role in the global food supply chain, ensuring the steady availability of fresh and high-quality produce across domestic and international markets. These businesses source vegetables directly from farmers or local markets, carefully selecting and grading the produce based on freshness, size, and quality standards. They often operate advanced storage and packaging facilities to maintain the nutritional value and shelf life of the vegetables during transit.

Exporters of vegetables are responsible for adhering to international regulations, quality certifications, and phytosanitary standards required by importing countries. With the increasing demand for organic and chemical-free produce, many exporters now specialize in sourcing vegetables that are grown using sustainable and eco-friendly farming practices. Their services include cold chain logistics, timely delivery, and customized packaging solutions that cater to the needs of global retailers, wholesalers, and food processing industries.

In addition to connecting farmers to the global marketplace, vegetable suppliers and exporters contribute significantly to the economy by creating employment and supporting agricultural growth. They enable the export of a wide variety of vegetables such as onions, potatoes, tomatoes, okra, and leafy greens to regions like the Middle East, Europe, North America, and Southeast Asia. With growing awareness about healthy eating and plant-based diets, the demand for fresh vegetables continues to rise, offering new opportunities for exporters to expand their reach and build strong international trade partnerships.

**Potato**

**Onion**

**Tomato**

**Carrot**

**Cucumber**

**Spinach**

**Garlic**

**Radish**

**Peas**

## Coal Suppliers

**Coal suppliers and exporters** play a critical role in the global energy and industrial landscape. They are responsible for sourcing coal from mining regions and delivering it to domestic and international markets. Coal, being a key source of energy for power generation and various industrial processes, remains in high demand in many parts of the world. These suppliers ensure a consistent and reliable flow of coal to meet the requirements of industries such as steel, cement, and thermal power plants

## Cow Dung Suppliers

**Cow dung suppliers and exporters** play a vital role in promoting sustainable and eco-friendly agricultural practices. Cow dung, traditionally used in rural households for fuel and as a natural fertilizer, has gained popularity worldwide for its organic and chemical-free properties. Suppliers ensure that the dung is collected hygienically, processed properly, and made available in various forms such as cakes, powders, or slurry, depending on the usage requirements. These products are widely used in organic farming, gardening, and as biofuel, making cow dung a valuable commodity in both domestic and international markets.

## Unmanufactured Tobacco Suppliers

**Unmanufactured tobacco** refers to raw or partially processed tobacco leaves that have not undergone the final manufacturing processes, such as blending, flavoring, or packaging into cigarettes or other tobacco products. This form of tobacco is in high demand across various industries, including cigar making, pipe tobacco production, and traditional hand-rolled cigarettes. Unmanufactured tobacco suppliers play a crucial role in ensuring the availability of high-quality raw tobacco to manufacturers worldwide. These suppliers typically source their tobacco leaves from select farms known for cultivating premium tobacco varieties.

## Stone Chip Suppliers

**Tejas International Ventures** is a leading name in the stone chips industry, offering high-quality stone chips for both domestic and international markets. As a manufacturer, supplier, exporter, and importer, Tejas International Ventures ensures that its customers receive top-grade stone chips with consistent quality, reliable supply, and timely delivery.

## Fish Suppliers

**Fish suppliers and exporters** play a crucial role in the global seafood industry by providing high-quality, fresh, and frozen fish to markets around the world. These businesses source fish directly from local fishermen or aquaculture farms, ensuring a steady supply of various species such as tuna, salmon, mackerel, sardines, and more. They focus on maintaining the freshness and nutritional value of the fish by using advanced preservation techniques like freezing, vacuum packing, and hygienic handling processes

## Meat Suppliers

**Meat suppliers and exporters** play a crucial role in the global food industry, ensuring the availability of high-quality meat products across domestic and international markets. These businesses source meat from farms, process it under strict hygiene standards, and supply it to restaurants, supermarkets, and food processing companies. Their operations involve maintaining a cold supply chain to preserve freshness and nutritional value, making them essential in meeting consumer demand for chicken, beef, lamb, pork, and other meat varieties.

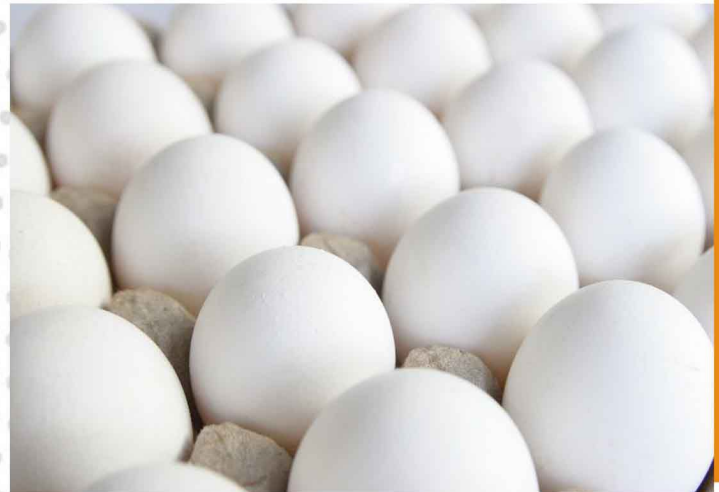

# Chicken Suppliers

**Chicken suppliers and exporters** play a vital role in the global food supply chain by providing high-quality poultry products to meet the growing demand in both local and international markets. These suppliers source their products from trusted farms and processing plants, ensuring that the chickens are raised in humane conditions and meet the required safety and quality standards. From fresh cuts to frozen chicken parts, the suppliers offer a wide range of products to cater to the diverse preferences of consumers, from restaurants and retail chains to individual households.

## White Eggs Suppliers

## Brown Eggs Suppliers
